# The Campaigning Wheel™

The Campaigning Wheel™

#### **Science**

Science is a systematic enterprise that builds and organizes knowledge in the form of testable explanations and predictions about the universe.

(Wikipedia)

# Science – Underlying Assumptions

- 1. there exists an objective reality shared by all rational observers
- 2. this objective reality is governed by natural laws
- 3. these laws can be discovered

(Wikipedia)

# **Underlying Assumptions in Short**

- 1. reality
- 2. natural laws
- 3. measurement

# Science is about explaining and predicting phenomena.

# **Definition Campaigning**

Campaigning is the art of changing people's behavior, thinking or attitudes in ways that help me reach a goal.

# Concrete decisions and actions taken by individual people.

The same questions and rules.

# There is no company, no state, no government, no administration making decisions or taking action.

# All there is are individuals with their dreams, their needs and their fears. That is a reality.

# Who are they?

How can we analyze them systematically?

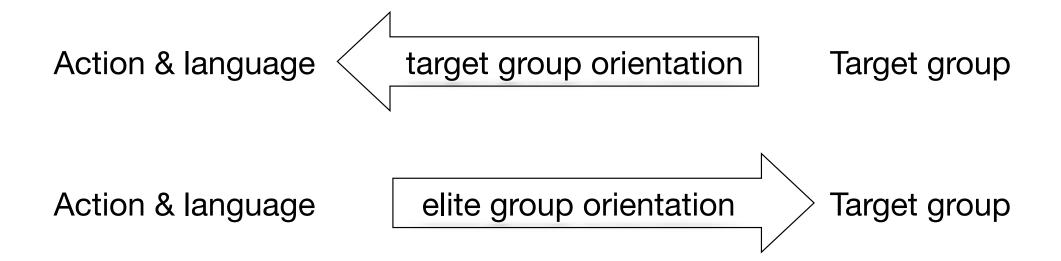

## **FORCES-Analysis™**

- Folks
- **O** bjectives
- R ules
- **C** onceptions
- **E** xpectations
- S copes

## **Target Group Orientation**

There have to be incentives.

The target group is king.

# You can't change a person if you don't know him or her really well.

# **True Target Group Orientation**

#### **ASK**

# **Perfect Target Group Orientation**

#### **Involve**

## **Target Community Labs™**

Workshops designed to let the fish invent the bait.

#### What works?

#### All is communication.

#### Communication is not all.

This coin has two sides.

#### Campaigning

communication x intervention

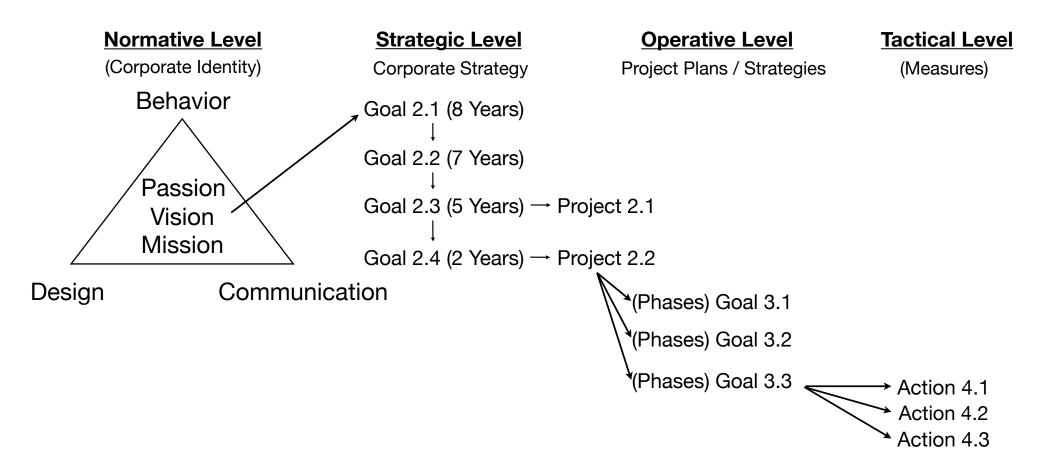

### Start with «Why?»

# Four Levels of Planning

# Strategic Campaigning Guidelines™ (SCG)

- 1. Polarize, profile, position
- 2. Control the agenda
- 3. Concentration of forces
- 4. Build on existing strengths
- 5. Maintain flexibility
- 6. Persistence and perseverance in strategy pursuit
- 7. Results orientation and coordination of goals and means
- 8. Exploitation of synergies and multiplication effects
- 9. Mindfulness and foresight
- 10. Unity of command
- 11. Efficiency and simplicity
- 12. Think in scenarios
- 13. Success Guidelines of communication
- 14. Build golden bridges

# Backup

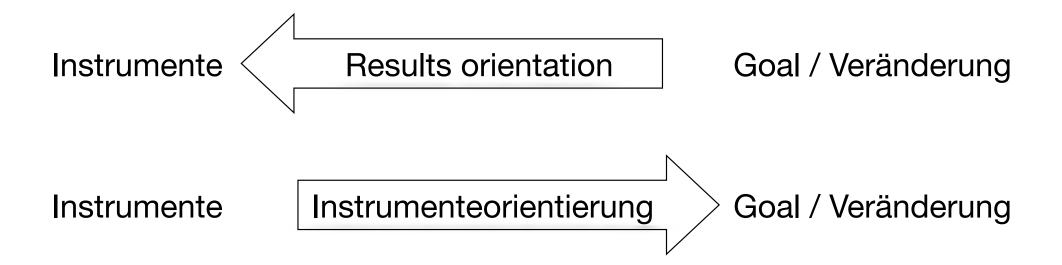

# Think backwards

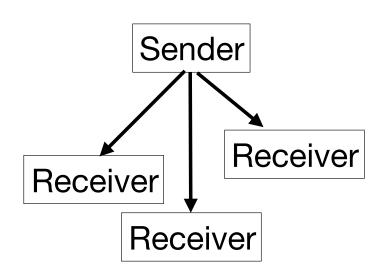

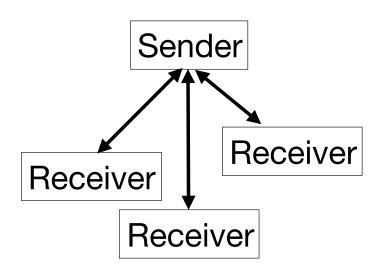

# **Results orientation**

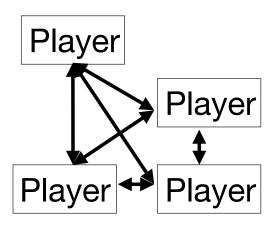

# **Empowerment or Peer-2-Peer Campaigning**

# **Definition Campaigning**

Campaigning is the art of being able to pull all the stops and move people to reach a goal as effectively and efficiently as possible.

- Granularity
- http://sethgodin.typepad.com/seths\_blog/2017/12/granularity.html
- You can't make an hourglass with a boulder.
- But break the boulder into sufficiently small bits of sand, and you can tell time.
- You wouldn't want to eat a baked loaf of ice cream, mustard, fish, bread, capers and cheese.
- But separate them into their component parts and you can open a restaurant.
- It's tempting indeed to build the one, the one perfect thing, here it is, it's for everyone.
- But one size rarely fits all.
- The alternative is break it into components, to find the grid and to fill it in. Not too small, not too big. Grains that match what we're ready to engage with.

# **Definition Goal**

A goal is a clearly defined state at some point in the future that we want to create through our actions, which we can not guarantee because of factors beyond our control.

Unlike a measure, we can only hope for a goal to be achieved.

achieving goals = change

# **Question critically**

- Does the formulated goal really describe what I want to achieve?
- 2. Would I bet my life on it?
- 3. What if the goal formulation was wrong how would I formulate the goal then?
- 4. What is the opposite of this goal formulation?

# **Definition Campaigning**

Campaigning ist die Kunst, Menschen zu bewegen und alle Register ziehen zu können, um möglichst effektiv und effizient ein Goal zu erreichen.

# More than information

Intention x (Information x InterAction) x Intervention

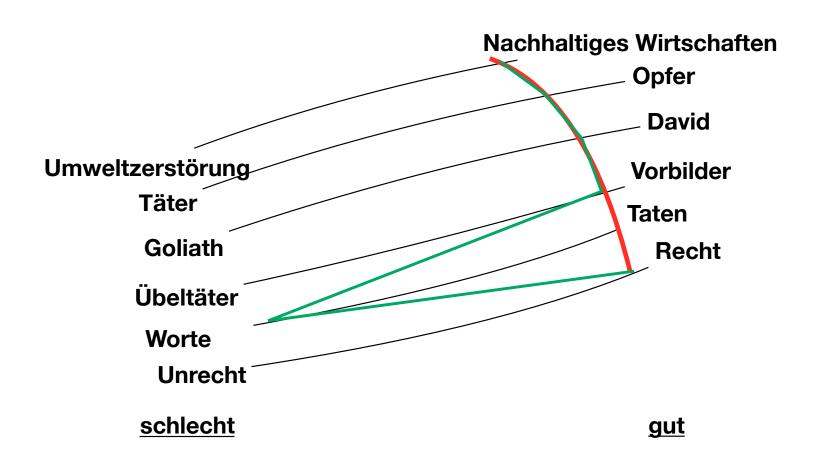

# Virtual March 2005

Teilnehmer stellen Bilder von sich und ihren Botschaften / Aktivitäten ins Internet.

#AV2020 - Kennzahlen

#### Aktivitätsanstieg seit Mai 2017

Links zu Content erhählt bei weitem die meisten Shares

Posts mit >300 Zeichen führen mit Abstand zum höchsten sozialen Engagement

Altersvorsorge 2020

Seit Mai 2017 ist klar: auch auf Facebook muss man jetzt auf die Kommunikation achten.

Wer hier Botschaften optimieren möchte, der sollte auf Posts mit Links setzen, über die man die höchsten Werte im Bereich Social Interaction erzielen kann. Das ist insofern ungewöhnlich, als normalerweise multimedialere Posts (inklusive Image oder Video) die Treiber sind. Wenn über politische Themen diskutiert wird, die Alltagsrelevanz haben, dann scheint die sachliche Argumentation aber immer noch der bessere Hebel zu sein.

"In der Kürze liegt die Würze!" – Was für Twitter richtig ist, ist für Facebook keine wirkliche Option. Text wird erwartet. Um genau zu sein, mindestens 300 Zeichen sollten Posts haben, um relevantes Engagement auszulösen.
